SUMMARY

Full-stack developer with 8+ years of experience building and maintaining web, mobile and backend systems in production. Currently the technical owner of the Real33 platform under a long-term contract, and creator of three products in production (InkedSync, Ledor and NextRead). End-to-end experience: from requirements and architecture to implementation, deployment and maintenance.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Real33

Jan 2025 – present · Remote

Long-term contract · platform for real estate agents

- Development of a platform that centralizes the real estate agent's routine: client and property management, listing portal, digital visit forms, template-based contracts and inspections
- End-to-end technical owner, from feature design to deployment
- Product in final development stage, with a closed beta coming soon

Full-Stack Developer — Freelancer

Jun 2018 – present · Remote

- Backend development, system integrations and new features in clients' internal products — mostly under NDA
- 10+ systems delivered: MLM e-commerce, trading automation bots, native Android apps, websites and automations
- Maintenance, bug fixing and performance optimization of production systems

DevOps Developer — Tedsys Software

Apr 2022 – Dec 2022 · Cabo Frio, Brazil

- Monitoring and maintenance of Linux servers on AWS
- Development and updates of integrations between systems
- Web vitals optimization (FCP, LCP, TTFB) on WordPress sites and data collection solutions for KPIs

Junior Back-End Developer — Mimetics

Aug 2021 – Feb 2022 · Cabo Frio, Brazil

- API development with FastAPI, SQLAlchemy and PostgreSQL
- Integration of financial operation APIs in a copy-trading social network
- Design and implementation of a scalable infrastructure for trading automation bots

Digital Marketing Assistant — Bigou

Jan 2020 – Feb 2021 · Rio Pomba, Brazil

- Creation and management of Facebook Ads and Google Ads campaigns; production of promotional artwork and videos

Full-Stack Developer — EmComp (Junior Enterprise)

Aug 2019 – Apr 2020 · Rio Pomba, Brazil

- Built responsive web systems for local businesses and campus projects; helped maintain the hosting servers

Sysadmin (Internship) — LicitUbá

Jun 2019 – Jan 2020 · Ubá, Brazil

- Preventive maintenance of server and database; updates to the web application and Android app; automated backup procedures

PERSONAL PROJECTS

InkedSync — Management app for tattoo artists: schedule, clients and finances. Flutter, Python, PostgreSQL. In closed beta. inkedsync.com

Ledor — Open source speed-reading app (RSVP/ORP, EPUB, TTS). Flutter, Android and Linux. github.com/daniel-pimenta-cc/ledor

NextRead — Reading shelf with AI-powered recommendations. Laravel (REST API), Angular, book API integrations. nextread.com.br

TECHNICAL SKILLS

Mobile: Flutter, Dart, native Android (Java)
Backend: Python (FastAPI), PHP (Laravel), REST APIs, system integrations
Front-end: Angular, JavaScript, HTML, CSS, Bootstrap
Data & Infra: PostgreSQL, MySQL, Docker, AWS, Linux, WordPress
